Aim: To implement exception handling

Program:

```
public class JavaExceptionExample {  
    public static void main(String args[]){  
        try{  
            //code that may raise exception  
            int data=100/0;  
            System.out.println("rest of the code...");  
        }  
        catch(ArithmeticException e) {  
            System.out.println(e);  
        }  
    }  
}
```

OUTPUT:

java.lang.ArithmeticException: / by zero
