

Aarya Vijay Arban

Batch – S11

Roll no. – 07

Aim – To study different scope of variables

File name – Aarya.c

Code:

```
#include<stdio.h>
int Aarya=2;
```

File name – Arban.c

Code:

```
#include<stdio.h>
#include"Aarya.c"
extern int Aarya;
float Arban=4;
void function()
{
    char Arban='a';
    printf(" \n New value of Arban after reusing is %c ",Arban);
}
void main()
{
    printf(" \n Old value of Aarya was %d",Aarya);
    printf(" \n Old value of Arban was %f",Arban);
    double Aarya=10;
    for (double i=0;i<3;i++)
    {
        Aarya++;
    }
    printf(" \n New value of Aarya after reusing is %2f",Aarya);
    function();
}
```

Ouput:

Old value of Aarya was 2

Old value of Arban was 4.000000

New value of Aarya after reusing is 13.000000

New value of Arban after reusing is a
