

Aarya Arban

S11-07

Assignment – 4(A) and 4(B)

Aim: To implement arithmetic operations in prolog

The screenshot shows a Prolog IDE with a file named `Area.pl` open. The code in the file is as follows:

```
costprice(Sp, Loss, Cp) :-  
    Cp is Sp+Loss, write(costprice).  
  
area(L, B, Area) :- Area is L*B, write(Area).
```

A terminal window titled "SWI-Prolog (AMD64, Multi-threaded, version 9.0.4)" is open, showing the following output:

```
File Edit Settings Run Debug Help  
Welcome to SWI-Prolog (threaded, 64 bits, version 9.0.4)  
SWI-Prolog comes with ABSOLUTELY NO WARRANTY. This is free software.  
Please run ?- license. for legal details.  
  
For online help and background, visit https://www.swi-prolog.org  
For built-in help, use ?- help(Topic). or ?- apropos(Word).  
  
?- costprice(10,5,Cp).  
costprice  
Cp = 15.  
  
?-  
% c:/users/aarya/onedrive/documents/prolog/area compiled 0.00 sec, -1 clauses  
?- area(2,4,Area).  
8  
Area = 8.  
  
?-
```

The status bar at the bottom of the IDE shows the file path `c:/users/aarya/onedrive/documents/prolog/area.pl` and the current line number `Line: 4`.
