

Aarya Arban

S11 – 07

Aim: Write a program in HTML to create a form to validate the email id entered by the user and also validate the password. The password should contain 10 - 12 characters along with at 1 capital, small , numerical and a special character.

Code:

```
<!DOCTYPE html>

<html>

<head>

    <title>Form Validation</title>

    <script>

        function validateForm() {

            var email = document.getElementById("email").value;

            var password = document.getElementById("password").value;

            var emailPattern = /^[a-zA-Z0-9._-]+@[a-zA-Z0-9.-]+\.[a-zA-Z]{2,4}$/;

            var passwordPattern = /^(?=.*[A-Z])(?=.*[a-z])(?=.*\d)(?=.*[@$!%*?&])[A-Za-z\d@$!%*?&]{10,12}$/;

            if (!email.match(emailPattern)) {

                alert("Please enter a valid email address.");

                return false;

            }

            if (!password.match(passwordPattern)) {

                alert("Password must contain 10-12 characters with at least 1 uppercase letter, 1 lowercase letter, 1 digit, and 1 special character.");

                return false;

            }

            return true;

        }

    </script>

</head>
```

```
<body>

  <h2>Registration Form</h2>

  <form onsubmit="return validateForm()">

    <label for="email">Email:</label>

    <input type="text" id="email" name="email" required><br>

    <label for="password">Password:</label>

    <input type="password" id="password" name="password" required><br>

    <input type="submit" value="Submit">

  </form>

</body>

</html>
```

Output:
